Discussion Questions

A Gentle Introduction to Bayesian Analysis with Applications to QuantCrit
ASHE Workshop

Alberto Guzman-Alvarez
Taylor Burtch
Benjamin Skinner

18 November 2023

Now that we've finished our working examples, here are some questions for discussion. We may have already considered some of them, but we may want to examine them further. These are in no particular order:

1. What are some promises of Bayesian approaches in quantitative educational research, both overall and in connection to QuantCrit and other critical work?
2. What are some difficulties?
    1. Technological?
    2. Social (*e.g.*, publication, citation)?
    3. For critical work?
3. What are some applications you can think of right now?
4. What would it take for Bayesian approaches to find more widespread use in educational research?
